CHOICE

CHOICE

CHOICE KONFIGURATOR - TOBIAS-GRAU.COM

CHOICE ermöglicht die Individualisierung von Einzeleuchten und Leuchtenkombinationen. CHOICE Komponenten können je nach Anforderung, Bedarf und Geschmack zusammengestellt werden. Formen, Materialien, Farben und Anordnungen sind weitestgehend frei wähl- und kombinierbar. Damit wird die Licht – und Leuchtengestaltung ein integrierter Bestandteil der innenarchitektonischen Planung.

CHOICE stands for the customisation of individual luminaires and luminaire combinations. The individual CHOICE components can be selected to suit the customer's needs, wants and tastes. The vast majority of the shapes, materials, colours and configurations are freely selectable and combinable. As a result, the lighting and luminaire design becomes an integrated part of the interior planning process.

CHOICE permet la création individuelle de vos luminaires et de vos solutions d'éclairage.

Les éléments CHOICE peuvent être combinés en fonction de la configuration sur place, de vos besoins et de votre goût. Les formes, matériaux, couleurs et emplacements des luminaires peuvent, dans une large mesure, être choisis et combinés librement. Ainsi, la conception de l'éclairage devient une partie prenante de la planification architecturale.

CHOICE significa Individualità sia nelle singole lampade che nella loro combinazione. Ciascun componente CHOICE può essere scelto a seconda delle esigenze, delle necessità e del gusto del singolo. Forme, materiali, colori e collocazione possono essere scelti quasi completamente a libero piacimento e creano innumerevoli possibilità. L'illuminazione ed il suo allestimento costituiscono un elemento integrante alla progettazione d'interni.

CHOICE significa la individualización de luminarias en numerosas combinaciones.

Los componentes individuales de CHOICE se pueden combinar dependiendo de las exigencias, necesidades, estilo y gusto. Formas, materiales, colores y el orden de disposición se pueden elegir y combinar en gran medida. De este modo las luminarias se convierten en una parte integral en la planificación de diseños interiores.

PLUG&DIM

Tobias Grau Leuchten sind grundsätzlich mit einem Phasendrehdimmer dimmbar, Steckerleuchten haben einen integrierten Dimmer. Ausnahmen und alternative Dimmtechniken finden Sie bei dem jeweiligen Produkt auf unserer Homepage.

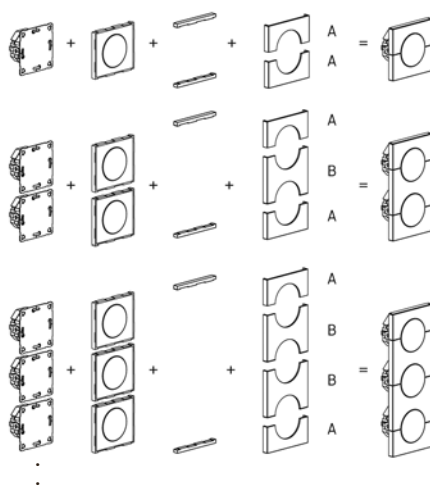

Tobias Grau luminaires are generally dimmable with a rotary phase control dimmer, plug-in luminaires have an integrated dimmer. Exceptions and alternative dimming technologies are shown with the respective product on our website.

Les luminaires TOBIAS GRAU sont en général dimmables avec un variateur rotatif à coupure de phase. Les luminaires avec prise intégrée sont équipés d'un variateur intégré. Les exceptions ainsi que d'autres modes de variation sont indiqués au niveau des produits sur notre site internet.

Le lampade TOBIAS GRAU sono generalmente regolabili attraverso un regolatore girevole a fasi, le lampade da parete con spina hanno un regolatore integrato. Le eccezioni e i metodi alternativi di regolazione li trovate insieme al relativo prodotto sulla nostra Homepage.

Las lámparas TOBIAS GRAU son en su mayoría regulables gracias a un dimmer giratorio de control de fase. Las Lámparas con enchufe tienen un dimmer integrado. Las características específicas, así como excepciones y técnicas de regulación alternativas se encuentran en la descripción de cada uno de los productos de nuestro sitio web.
